I've put together the initial prototype of the website for you to look over whenever you have a moment. You can view it here: <https://twac.netlify.app/>

Please take your time to explore the site. There is absolutely no rush on this. Let me know if you are happy with the current layout, or if there are any edits, deletions, or changes you would like me to make. We can refine it as much as needed.

To help us gradually fill in the remaining placeholders, I've put together a checklist of the official details, domain preferences, and photo resources we will eventually need. Please do not worry about gathering everything all at once —just share whatever is currently available at your convenience. If any photos are missing, it is not an issue at all; I can easily edit what you send or create new graphics from scratch.

1. Domain Name Ideas Whenever you are ready to decide on the official website address for the site, here are a few .org options that might fit well:

- twachennai.org
- wavhs.org
- thalassemiachennai.org

Let me know if any of these stand out to you, or if you have another specific suggestion.

2. Official Contact & Registration Details

- **Contact Information:** Primary and helpline phone numbers, and the complete address with the pincode.
- **Registration Numbers:** Society registration number, PAN, 80G registration certificate number (with validity date), and 12A registration certificate number.
- **Bank Account Details:** Information for receiving donations (NEFT/RTGS/UPI).

3. Photo & Brand Resources

- **TWA Logo:** High-resolution PNG or SVG (white and colour versions if possible).
- **Portraits & People:** A professional portrait or candid photo of Dr. Revathi Raj, and a group photo of the TWA team, patients, or volunteers at VHS Taramani.
- **Events & Activities:** Photos of a community event/awareness camp, and a Camp Rainbow art therapy session.
- **Medical & Programs:** Contextual photos of a blood transfusion session at VHS, a BMT procedure, and a prenatal screening/Medisca Systems lab photo.

Looking forward to your feedback and your domain preference whenever you are ready. Once you let me know your thoughts and provide any available resources, I will get everything updated and share the next version of the prototype with you.

Best regards,

Toufick Shaikh

Draft To: twachennai@gmail.com, revaraj@yahoo.com

Dear Dr. Revathi and the TWA Team,

I hope you are doing well and having a good week.

I know how busy things can get at the center, so I just wanted to send a quick follow-up regarding the website prototype I shared last week (<https://twac.netlify.app/>).

Even if you haven't had a chance to gather the photos or official details yet, I would love to hear your initial thoughts on the overall layout and the domain name options whenever you have a moment. That will help me keep the momentum going on the design side while we wait for the remaining assets.

Please take your time, and let me know if you need me to resend any of the details from my previous email.

Best regards,

Toufick
